Hi Scott,

Attached is an updated tracker which shows some changes based on additional work and some new tickets that have come in around the last data call. Please do let me know if you have any questions or would like me to schedule a meeting to review the long and/or to capture your next steps/ decisions.

Thanks,
Jenn Lipiew

On Mon, Jun 2, 2014 at 12:20 PM, Jennifer Lipiew - MX-C <jennifer.lipiew@gsa.gov> wrote:

Hi Scott,

Attached is an updated copy of the FDCCI user issues log (also on MAX:

(b) (4) If you could review the "open" (pink) rows and let me know how you'd like to proceed, that would be great. I have left the "in progress" rows displayed in case you are interested in the other issues we are working on. The rows for all resolved issues are hidden.

Please let me know if you have any questions or would like me to set up a meeting to provide you with additional background and detail on each item. Many thanks in advance for your guidance.

Best,
Jenn Lipiew

Hi Scott,

Thanks for taking my call. I will send you an up-to-date version of my Excel tracker on Monday so that you can work through open issues. I really appreciate your lending your expertise and energy to this effort.

Take care,
Jenn Lipiew

Need a favor, having trouble tracking all these inquiries. Can you please work to create a system where I can see these on MAX or look at them in batch?

Scott

Subject: Fwd: HPC

Hi Scott,

I had a chance to talk to Grant from NASA (copied) this morning. His earlier HPC question boils down to whether agencies should report their back-up storage ("tapes") that happens to be online for quicker COOP response. Right now NASA has high storage numbers b/c they included their DR/ tape back-up. Can you please confirm that this type of storage should not be reported, or provide other advice on how to report it?

I imagine other agencies have similar issues, so we can also discuss this during the next Task Force meeting too. Grant works for (b) (6) (the FDCCI TF Lead) and I have asked him to talk with her about setting up a meeting with OMB to discuss their data quality as well as some of their reporting challenges.

Thanks,

Jenn Lipiew

Jennifer,

Can you tell me if Tape Backup data that is connected via NAS considered part of the overall SAN/DAS/NAS storage? (b) (5)

I only have one day left to get data enter in portal.

Cc: Mark Day <mark.day@gsa.gov>
Subject: Fwd: IaaS Update for today's cloud meeting

Larry/Stan - since Kurt did not provide the updated ATO dashboard report for this morning, I used the info provided in his risk register report to update the dashboard slide. Going forward, I'd like the cloud team to own the entire update and make sure that Mark/I have what's needed for the weekly update to OMB. You guys can work with Mark on preference for day he'd like the update provided (but Wednesday night/Thursday morning are obviously too late). Mark - ten hardcopies of this slide are needed for the Thursday meeting. I will be bringing those copies this morning. Mary

Hi Scott,

Attached is an updated tracker which shows some changes based on additional work and some new tickets that have come in around the last data call. Please do let me know if you have any questions or would like me to schedule a meeting to review the long and/or to capture your next steps/ decisions.

Thanks,
Jenn Lipiew

On Mon, Jun 2, 2014 at 12:20 PM, Jennifer Lipiew - MX-C <jennifer.lipiew@gsa.gov> wrote:

Hi Scott,

Attached is an updated copy of the FDCCI user issues log (also on MAX:

(b) (4) If you could review the "open" (pink) rows and let me know how you'd like to proceed, that would be great. I have left the "in progress" rows displayed in case you are interested in the other issues we are working on. The rows for all resolved issues are hidden.

Please let me know if you have any questions or would like me to set up a meeting to provide you with additional background and detail on each item. Many thanks in advance for your guidance.

Best,
Jenn Lipiew

On Fri, May 30, 2014 at 5:04 PM, Jennifer Lipiew - MX-C <jennifer.lipiew@gsa.gov> wrote:

Hi Scott,

Thanks for taking my call. I will send you an up-to-date version of my Excel tracker on Monday so that you can work through open issues. I really appreciate your lending your expertise and energy to this effort.

Take care,
Jenn Lipiew

Subject: Fwd: HPC

Hi Scott,

I had a chance to talk to Grant from NASA (copied) this morning. His earlier HPC question boils down to whether agencies should report their back-up storage ("tapes") that happens to be online for quicker COOP response. Right now NASA has high storage numbers b/c they included their DR/ tape back-up. Can you please confirm that this type of storage should not be reported, or provide other advice on how to report it?

I imagine other agencies have similar issues, so we can also discuss this during the next Task Force meeting too. Grant works for Karen E. Petraska (the FDCCI TF Lead) and I have asked him to talk with her about setting up a meeting with OMB to discuss their data quality as well as some of their reporting challenges.

Thanks,

Jenn Lipiew

Larry/Stan - since Kurt did not provide the updated ATO dashboard report for this morning, I used the info provided in his risk register report to update the dashboard slide. Going forward, I'd like the cloud team to own the entire update and make sure that Mark/I have what's needed for the weekly update to OMB. You guys can work with Mark on preference for day he'd like the update provided (but Wednesday night/Thursday morning are obviously too late). Mark - ten hardcopies of this slide are needed for the Thursday meeting. I will be bringing those copies this morning. Mary

Would it be possible to have these on Tuesday COB (best), or at worst Wednesday before Mary's 9:30 staff meeting? That way any key issues can be identified and worked if needed on Wednesday and we can avoid Mary or I saying something that is out of date/wrong. Tell me what's possible if this is not reasonable and let's work it. Thx.

Would it be possible to have these on Tuesday COB (best), or at worst Wednesday before Mary's 9:30 staff meeting? That way any key issues can be identified and worked if needed on Wednesday and we can avoid Mary or I saying something that is out of date/wrong. Tell me what's possible if this is not reasonable and let's work it. Thx.

Larry/Stan - since Kurt did not provide the updated ATO dashboard report for this morning, I used the info provided in his risk register report to update the dashboard slide. Going forward, I'd like the cloud team to own the entire update and make sure that Mark/I have what's needed for the weekly update to OMB. You guys can work with Mark on preference for day he'd like the update provided (but Wednesday night/Thursday morning are obviously too late). Mark - ten hardcopies of this slide are needed for the Thursday meeting. I will be bringing those copies this morning. Mary

Scott - we're moving the solicitation package forward which includes ability for state/local/tribal ordering. Our acquisition management (policy) people were asking if this contract should go through the OFPP business case process since it's gov wide. This of course would probably add a few months to the process and our ability to get something in place. Given we did not do this for IaaS and EaaS as they were directed in 25 Pt Reform Plan, and similarly DHS has been given responsibility to oversee and assist with Government-wide and agency-specific efforts to provide adequate, risk-based, and cost-effective cybersecurity solutions within the executive branch per the Office of Management and Budget (OMB) Memorandum 10-28, Clarifying Cybersecurity Responsibilities and Activities of the Executive Office of the President and the DHS. (Memorandum 10-28 grants DHS the primary responsibility within the Executive Branch for the operational aspects of Federal agency cybersecurity with respect to the Federal information systems that fall within the Federal Information Security Management Act of 2002 (FISMA) under 44 U.S.C. §3543), was wondering what your thoughts were on this.

thanks, Mary

This needs to be a two way dialogue with industry with DHS being more proactive in the different architectural approaches for cloud that could work in conjunction with TIC. We cannot wait for vendors to come to us. My two cents.....leadership.

Subject: Re: FedRAMP - TIC Guidance

DHS is meeting with Amazon Web Services on Monday January 23. Amazon is plans to present three ways they think they can meet the TIC requirement for its cloud services.

No other cloud provider has come forward with a proposal to protect federal customers in conjunction with TIC. I have stated in several public forums that DHS is willing to meet with any CSP about their particular architecture and hear what they propose. Because every CSP may have different internal designs, a single DHS specification probably would not work for CSPs.

I continue to be willing to meet with any and all CSPs about their particular designs.

Subject: RE: FedRAMP- TIC Guidance

Hi Bobbie,

Hope the New Year has started well for you.

I wanted to follow up on a DHS-related, FedRAMP item. At the meeting we had in December, we talked much about coordinating the various efforts around continuous monitoring to ensure that they FedRAMP controls are integrated. We also discussed the importance of the TIC Program as it relates to cloud.

Under section 4(a)(iv) of the FedRAMP policy memorandum, DHS is responsible for “developing guidance on agency implementation of the TIC Program with cloud services.” GSA conducted an industry outreach day last week and there were multiple questions on TIC. We also have a FedRAMP agency day scheduled for this Friday and TIC is sure to come up.

Given our FedRAMP initial operating capability date of early May, can DHS please provide this guidance by February 29, 2012 to the FedRAMP PMO at GSA. We would like to issue it sooner rather than later and doing so would help tremendously as we continue to outreach the goals and objectives of FedRAMP.

Scott Renda on my staff (cc:ed (b) (6)) leads our FedRAMP efforts, and he and the GSA team are available to work with your team to ensure we meet the FedRAMP timelines and expectations.

Thanks for your consideration.

Best,
Lisa Schlosser

Sean

Would love to hear more about how the Amazon meeting went as it related to TIC and cloud. From previous discussions with DHS when the FedRAMP memo was being worked and signed out, it was our understanding that there wouldn't (perhaps even shouldn't) be one definitive architectural model, that we wanted to develop guidance which gave agencies ideas, considerations, possible architectural models which would enable them to comply with TIC as they push out to clouds in varying degrees. Are there differences for MTIPS vs. TICAP vs. TIC? It's fantastic that DHS is willing to meet with any provider and hear them out. The gist behind FedRAMP though is to get out of ahead of that scenario, since that in of itself becomes a possible chokepoint. Can we find a way in the middle? If one pole is one architecture and the other pole is a plethora of designs, then can DHS consider some best of breed? Are there ones which are unacceptable? Also, re: the TIC 2.0 reference architecture, sure we can consider the OUO piece, and I admit I only did a light skim when it went out, did that have a cloud piece or pieces which are easily related to cloud? Thoughts?

Regards,
Scott

Subject: Re: FedRAMP - TIC Guidance

DHS is meeting with Amazon Web Services on Monday January 23. Amazon is plans to present three ways they think they can meet the TIC requirement for its cloud services.

No other cloud provider has come forward with a proposal to protect federal customers in conjunction with TIC. I have stated in several public forums that DHS is willing to meet with any CSP about their particular architecture and hear what they propose. Because every CSP may have different internal designs, a single DHS specification probably would not work for CSPs.

I continue to be willing to meet with any and all CSPs about their particular designs.

Subject: RE: FedRAMP - TIC Guidance

Hi Bobbie,

Hope the New Year has started well for you.

I wanted to follow up on a DHS-related, FedRAMP item. At the meeting we had in December, we talked much about coordinating the various efforts around continuous monitoring to ensure that they FedRAMP controls are integrated. We also discussed the importance of the TIC Program as it relates to cloud.

Under section 4(a)(iv) of the FedRAMP policy memorandum, DHS is responsible for “developing guidance on agency implementation of the TIC Program with cloud services.” GSA conducted an industry outreach day last week and there were multiple questions on TIC. We also have a FedRAMP agency day scheduled for this Friday and TIC is sure to come up.

Given our FedRAMP initial operating capability date of early May, can DHS please provide this guidance by February 29, 2012 to the FedRAMP PMO at GSA. We would like to issue it sooner rather than later and doing so would help tremendously as we continue to outreach the goals and objectives of FedRAMP.

Scott Renda on my staff (cc:ed (b) (6)) leads our FedRAMP efforts, and he and the GSA team are available to work with your team to ensure we meet the FedRAMP timelines and expectations.

Thanks for your consideration.

Best,
Lisa Schlosser

Would it be possible to have these on Tuesday COB (best), or at worst Wednesday before Mary's 9:30 staff meeting? That way any key issues can be identified and worked if needed on Wednesday and we can avoid Mary or I saying something that is out of date/wrong. Tell me what's possible if this is not reasonable and let's work it. Thx.

Larry/Stan - since Kurt did not provide the updated ATO dashboard report for this morning, I used the info provided in his risk register report to update the dashboard slide. Going forward, I'd like the cloud team to own the entire update and make sure that Mark/I have what's needed for the weekly update to OMB. You guys can work with Mark on preference for day he'd like the update provided (but Wednesday night/Thursday morning are obviously too late). Mark - ten hardcopies of this slide are needed for the Thursday meeting. I will be bringing those copies this morning. Mary

JAB Members and Teams -

The agenda for tomorrow's meeting:

- | CGI Federal
- | HeartBleed Status
- | Economic Systems FHR Navigator
- | Continuous Monitoring Reporting Format
- | Continuous Monitoring Past Due Update
- | CSP Status

Please see the attached materials we will use in the meeting:

- 1) Meeting Agenda and Slides (*JAB FedRAMP April FINAL.pptx*)
- 2) Continuous Monitoring One Pager Template (*MonthlyConMonReport.doc*)
- 3) CGI ConMon Update (*CGI FedRAMP JAB FINAL Presentation.pptx*)
 - | as a note, this presentation has also been incorporated in to the Meeting Agenda and Slides for easier review in the meeting

Any questions in advance, please don't hesitate to let me know.

Subject: Re: FedRAMP - TIC Guidance

DHS is meeting with Amazon Web Services on Monday January 23. Amazon is plans to present three ways they think they can meet the TIC requirement for its cloud services.

No other cloud provider has come forward with a proposal to protect federal customers in conjunction with TIC. I have stated in several public forums that DHS is willing to meet with any CSP about their particular architecture and hear what they propose. Because every CSP may have different internal designs, a single DHS specification probably would not work for CSPs.

I continue to be willing to meet with any and all CSPs about their particular designs.

Subject: R E :FedRAMP- TIC Guidance

Hi Bobbie,

Hope the New Year has started well for you.

I wanted to follow up on a DHS-related, FedRAMP item. At the meeting we had in December, we talked much about coordinating the various efforts around continuous monitoring to ensure that they FedRAMP controls are integrated. We also discussed the importance of the TIC Program as it relates to cloud.

Under section 4(a)(iv) of the FedRAMP policy memorandum, DHS is responsible for “developing guidance on agency implementation of the TIC Program with cloud services.” GSA conducted an industry outreach day last week and there were multiple questions on TIC. We also have a FedRAMP agency day scheduled for this Friday and TIC is sure to come up.

Given our FedRAMP initial operating capability date of early May, can DHS please provide this guidance by February 29, 2012 to the FedRAMP PMO at GSA. We would like to issue it sooner rather than later and doing so would help tremendously as we continue to outreach the goals and objectives of FedRAMP.

Scott Renda on my staff (cc:ed/(b) (6)) leads our FedRAMP efforts, and he and the GSA team are available to work with your team to ensure we meet the FedRAMP timelines and expectations.

Thanks for your consideration.

Best,
Lisa Schlosser

JAB Members and Teams -

The agenda for tomorrow's meeting:

- | CGI Federal
- | HeartBleed Status
- | Economic Systems FHR Navigator
- | Continuous Monitoring Reporting Format
- | Continuous Monitoring Past Due Update
- | CSP Status

Please see the attached materials we will use in the meeting:

- 1) Meeting Agenda and Slides (*JAB FedRAMP April FINAL.pptx*)
- 2) Continuous Monitoring One Pager Template (*MonthlyConMonReport.doc*)
- 3) CGI ConMon Update (*CGI FedRAMP JAB FINAL Presentation.pptx*)
 - | as a note, this presentation has also been incorporated in to the Meeting Agenda and Slides for easier review in the meeting

Any questions in advance, please don't hesitate to let me know.

Date: Wed, Sep 24, 2014 at 11:06 AM
Subject: ACTION REQUIRED: DAP Access
To:
Cc: Marina Fox - XC0D <marina.fox@gsa.gov>

DAP users:

If you are receiving this email, the account you currently use to access DAP is based on a

non-government [gmail.com](https://www.gmail.com) address. Given the expansion of DAP to allow users to see

government-wide data, we are tightening access to DAP to ensure that only authorized

government-issued email accounts (.gov, .mil, etc.) and authorized contractor email

addresses have access to the data. As a result, DAP staff will begin removing personal

[gmail.com](https://www.gmail.com) addresses in the system on October 15, 2014.

To continue to have access to the DAP data, you will need to associate your government

email address (.mil, .gov, etc.) with Google. Please see the instructions on associating your

government-issued email address with Google:

Associating your Government Email Account with Google Analytics

To access DAP using your government-issued email address, you must first associate your

agency .gov/.mil email address with Google Analytics by filling out the New Account form at

<https://accounts.google.com/NewAccount>. NOTE: Make sure to click the *"I prefer to use my*

current email address" link under the "Choose a username" input field and enter your agency

.gov or .mil email address there. Once that is accomplished, send an email to dap@gsa.gov

to request access to the DAP Google Analytics account. **In the subject line, please write**

"Replacement for Gmail Address", and make sure to specify the .gov/.mil or other address

you have associated.

If you run into problems associating your government email address with Google, please

send an email to dap@gsa.gov and include the following information:

1)

the current Gmail address that is granted access in DAP

2)

the .gov/.mil address you attempted to associate, and

3)

the agency and/or subagency for which you work. We will respond with further information.

If you are a contractor with a gmail.com address and do not have a government-issued email

account, please email dap@gsa.gov and cc your federal supervisor with a justification for the

need to access the DAP data using a non-government email address.

Thank you for your cooperation.

To: Scott Renda <(b) (6) @omb.eop.gov>

Scott - we're moving the solicitation package forward which includes ability for state/local/tribal ordering. Our acquisition management (policy) people were asking if this contract should go through the OFPP business case process since it's gov wide. This of course would probably add a few months to the process and our ability to get something in place. Given we did not do this for IaaS and EaaS as they were directed in 25 Pt Reform Plan, and similarly DHS has been given responsibility to oversee and assist with Government-wide and agency-specific efforts to provide adequate, risk-based, and cost-effective cybersecurity solutions within the executive branch per the Office of Management and Budget (OMB) Memorandum 10-28, Clarifying Cybersecurity Responsibilities and Activities of the Executive Office of the President and the DHS. (Memorandum 10-28 grants DHS the primary responsibility within the Executive Branch for the operational aspects of Federal agency cybersecurity with respect to the Federal information systems that fall within the Federal Information Security Management Act of 2002 (FISMA) under 44 U.S.C. §3543), was wondering what your thoughts were on this.

thanks, Mary
